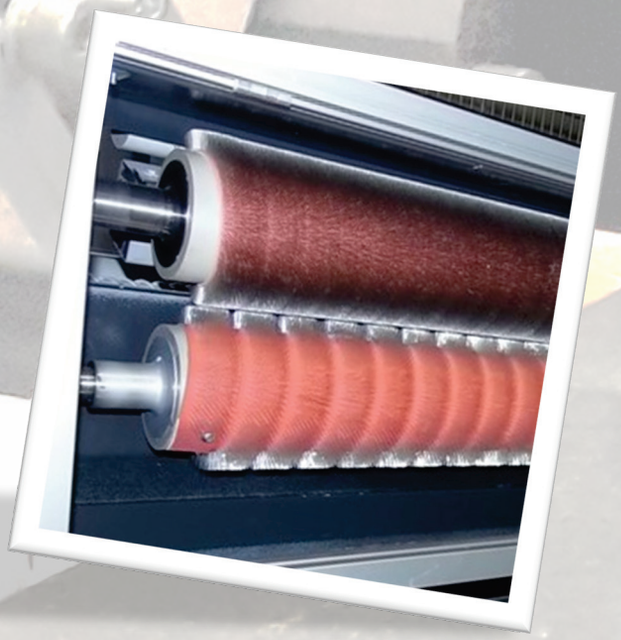
Since 1961

SHEARING MACHINES CSM1

Shearing unit:

- Blade support vertical leveling device with bearing arms and adjusting screws, self-aligning bearings.
- Combination permitting oscillating motion, holder of lubricating felt,
- 4 mm thickness ledger blade of special R4 quality;
- High performance hollow type cylinder, dynamically balanced, equipped with spirals plain or with cut file;
- Strong table with replaceable hardened steel edge;
- Exhaust hoods to convey lint and dust from any brushing, velveteen, shearing and beating roller to the suction unit;
– Fabric drawing roller clothed with a corrugated rubber band and driven by a frequency controlled AC geared motor;
– Folding unit at outlet consisting of placed in the machine front upper side extension
- Spreading unit
- Centering device at inlet
- Metal detector
- Automatic Seam detector
- Cutting height adjustable from Operator panel

The shearing machine type CSM1 it's consisting of:
frame made of a strong and thick steel plate,
with footboard ensuring to the staff a good operation control;
Fabric feeding roller driven by a frequency control AC geared motor;
A rotary brushing roller working on the fabric front side before the shearing unit;



Velveteen Unit

SHEARING MACHINE CSM1

ROLLER WIDTH	**2000-3600mm**
WORKING WIDTH	**1800-3600mm**
FABRIC FEED SPEED	**40m/min**
INSTALLED POWER	**23Kw**
POWER ABSORPTION	**18Kw**
AIR PRESSURE	**5 bar**
COMPRESSED AIR	**2 m3 /h**

Carù, who has been designed and manufacturing textile finishing machinery since the early sixties, always looking for technologically advanced solutions;
