OF Line

The Ultimate Cutting System for Massive Open-width Fabric Productivity

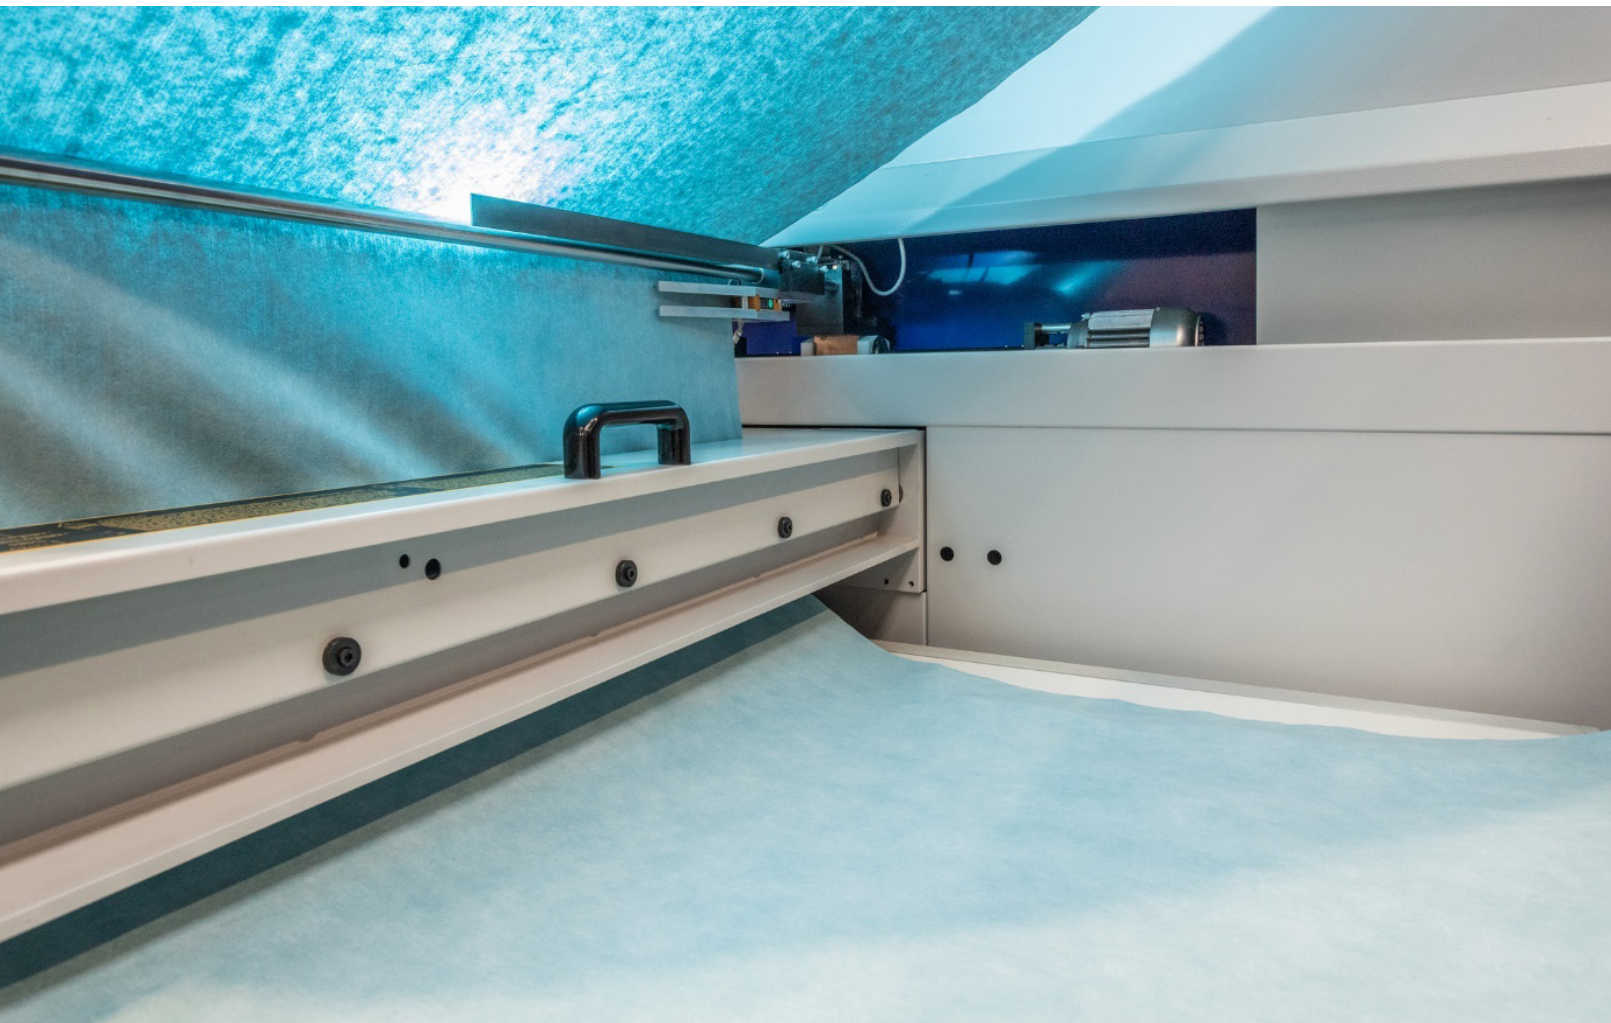

OF Line is a Smart Die Cutting system equipped with an innovative feeder for **Open Width Fabric**, specifically developed to feed **woven** and **non-woven** materials.

The advantage of the OF Line is the **continuous nesting technology** for **material usage optimization** and higher **productivity** guaranteeing **repeatability** and **quality**.

Quick change of cutting styles reduces down time and increases productivity.

Industry 4.0 HMI supports ERP system connection as well as remote maintenance.

The machine is an advanced industrial and heavy duty cutting system **engineered** and **manufactured in Italy** able to support a **24:7 seamless production**.

The OF Line is a modular cutting system that can be equipped with a different number of feeders and with different die cutting punches depending on specific customer requirements. The main benefits are:

HIGH PRODUCTIVITY FLEXIBILITY
SUSTAINABILITY LABOUR COST SAVING QUALITY

TECHNICAL DETAILS

FEEDING SYSTEM

Maximum open width fabric: 2050 mm
Maximum diameter: 900 mm

CUTTING AREA

Different possibilities based on configuration

MODULARITY

Compatible with other Bierrebi feeders

CONTROL SYSTEM

Industrial PLC based
Windows based HMI with touchscreen
Industry 4.0
Remote Service connectivity
Remote dashboard
ERP Interface possibilities

MAIN APPLICATIONS

✓MEDICAL GOWNS ✓WORKWEAR ✓UNDERWEAR ✓ACTIVEWEAR ✓AUTOMOTIVE ✓AEROSPACE
