

EZTEX

AUTOMATIC WARP KNOTTING MACHINE

EZTEX automatic warp knotting machine is the best warp tying solution for silk and polyester yarns, and is also an ideal solution for almost all kinds of yarns as long as the warp yarns are with 1/1 lease.

It adopts a special knotting mechanism to work with yarns of very fine counts at high speed, such as pure silk of 15d-22d, which is very weak yarn and other machines cannot work with it or have to work at a very slow speed.

It is a perfect solution for waterjet looms, silk looms and various other weaving looms. Trolley type knotting frames, on-loom compact knotting frames, on-loom economic knotting frames are optional for different factory setups.

MODEL	EZTEX cutter type	EZTEX tube type	EZTEX tube type double knot
Max Speed	400 knots/min		
Working Width	50mm-2500mm		
Working Speed	400 knots per minute maximum, stepless speed adjustment		
Yarn range	warp yarns of natural fiber, synthetic fiber, chemical fiber		
Yarn count range	15D-150d or equivalent	100d-2000D or equivalent	100d-2000D or equivalent
Lease condition	warp yarn with lease only		
Knot Type	single knot	single knot	double knot
Knotting frame	on-loom knotting frame; trolley knotting frame		
Power Supply	AC 220V 50HZ		
Packing dimension	300cm x 70cm x 50cm 300KGS (2300mm machine)
